

# Install Chrome on Your Laptop

## Step 1

Check for Chrome on your laptop. Look for this icon

## Step 2

If you do not have Chrome, Install chrome by opening a different browser (Edge/Firefox).

## Step 3

Type Google Chrome Download in the search bar and then Download Now

A screenshot of a web browser window showing search results for "Google chrome download". The search bar at the top contains the text "Google chrome download". Below the search bar, the first result is "Google Chrome - Download Chrome Today" with the URL "https://www.google.com". To the right of this result is a "Download" button. Below the main result, there are two columns of text: "Download Now" and "Browser Security".

Google Chrome - Download Chrome Today  
<https://www.google.com> ▾

**Download**

**Download Now**  
Get a new and fast web browser.  
**Download Chrome** and start browsing.

**Browser Security**
