

# PORSCHE TECHNOLOGY APPRENTICESHIP PROGRAM (PTAP)

## MANUFACTURER-PAID<sup>1</sup>

PTAP students have been learning about and working on Porsche's high-performance vehicles since 1999. As the manufacturer has expanded beyond its legendary Carrera sports car to SUVs and sedans, hybrids, diesels and more, the curriculum has kept pace right alongside.

PTAP training offers an opportunity to gain skills at Porsche Cars North America's training centers in Atlanta, Georgia; Easton, Pennsylvania; and Eastvale, California. Class sizes are limited!

In this program, students work with the latest Porsche-provided equipment and vehicles. Graduates gain the ability to achieve Bronze level certification within their first year on the job at a Porsche dealership. As part of the training, students put in 200 miles behind the wheel of Porsche vehicles in order to familiarize themselves with the models they'll work on in the field.

Porsche provides rent-free student housing and only a nominal maintenance fee will be paid while attending PTAP.

## WHAT YOU'LL LEARN

- **HERITAGE & SPORTS CAR SERVICE & GENERAL REPAIR**
